WELLCOME HISTORICAL MEDICAL LIBRARY

PREFACE

—:o:—

IN presenting my second volume of Occult Bibliographies to the public, I have to thank my numerous readers for the kind reception they have accorded my first effort on "Rosicrucian Books"; the work is now quite out of print, and copies are only obtainable at a premium. I hope that this second volume will prove even more popular than the first one, as I believe it will appeal to a larger circle of readers.

I do not pretend that this Catalogue is complete, but it refers to over 1,400 works, and to give some idea of the labour involved, I may say that, with the exception of a very few entries, all of the books herein enumerated have passed through my own hands, so that I can vouch for the accuracy of my description of them; it has entailed the labour of many years, but it has been a labour of love, the result of my devotion to Occult Studies, and I do not hope for any profit from its sale. Should my health and means permit, I intend to issue a third volume on "Alchemical Books," and some of my friends are sanguine enough to predict a greater success for this than any of its predecessors have attained; at any rate I have endeavoured in the present volume to render as complete as possible a work intended to embody a catalogue of the literature of the whole world in this enticing branch of occult study, so as to place within reach of the student a volume of reference to a science that has laboured for many years under numerous shortcomings; not the least of which are the Charlatanry and Quackery indulged in even at the present day by irresponsible quidnuncs who are all willing to supply the gaping crowd with prophecies to suit their taste, and cheap love oracles to all and sundry lads and lasses who are bold enough to seek to know what fate has in store for them.

I believe Astrology to be a true science when properly understood; it dates back to a great antiquity; the Arabians, Chaldæans,

Babylonians, Egyptians, etc., all studied it, and have left their records. Astrology has gradually filtered down through numerous channels, becoming tinged and coloured more or less with the personalities and characteristics of the Translators and Annotators until the finale is reached in the present age. We, in our superlative arrogance, go one better than the Ancients, and tack on two more planets, *viz.*, "Herschel" and "Neptune," ousting "Saturn" and "Jupiter" out of two of their houses to make room for the new-comers, and would it be invidious on my part to say that they would be ousted in their turn should we discover two more planets in the future, as is quite possible, and no one can say where it would all end, once you admit the influence of new-comers into our ken.

I am afraid much nonsense has been written about the influence of Herschel and Neptune, and I do not agree with these new ideas, because very few people live long enough for "Herschel" to complete the round, eighty-four years being the time taken to complete his cycle, a calculation published only on 20th March, 1865 (the planet was discovered 13th March, 1781). With Neptune the time is longer still, so that to live through his cycle is a still more remote possibility for any individual life.

It is obvious that neither of these planets were known to the Ancients, for on an old mummy case in Egypt we have the planets arranged in order, and the signs of the Zodiac around them evenly distributed, shewing their Houses of Exaltation and Fall; and again in the old records, Berosus (*vide Cory's Fragments*) states that the God Bel created the Stars, Sun, Moon and *Five Planets*, thus shewing that in the earliest ages there were only seven known planets corresponding to the days of the week, the septenary nature of man, and other similar correspondences.

The modern writers have also thought fit to reject signs which have been handed down to us from antiquity, such as the "*Dragon's Head*" and "*Tail*" and the "*Part of Fortune.*" If it is good enough for us to take up the Science from our ancestors at all, why reject one portion and accept another; all the old writers include these three factors in their writings, and they must have had good reasons for doing so, yet our modern descendants, in their superlative wisdom, reject them and introduce two new

planets as well, and with it all, they are none too correct in their prognostications, for it is one thing to prophecy, and another to prophecy that which becomes realised.

In compiling this work, I have arranged the titles on the same plan as in the preceding one, which is also the method employed in the Library of the British Museum—*viz.*, under *Authors*, and when one or more publications have been issued by any one person, then they are arranged in chronological order, and are followed (with few exceptions) by other editions in various languages by various subsequent writers; where this arrangement has been deviated from I have placed cross-references.

It would be very invidious for me to say which modern handbook I consider suitable to place in a beginner's hands; he would do best to select one that adheres most closely to the old writers, and to ignore the fanciful nonsense which is foisted upon the unwary, especially by Charlatans who adopt the *pseudonyms* of the old writers. I have been obliged to mention their works, otherwise my book would have been incomplete, but beyond the bare mention I have gone no further. Concerning one notorious modern swindler, I have expunged his works completely, as I would not give him a gratuitous advertisement at any price. I consider it a mean and contemptible proceeding to use Occult Arts as a method of making money, and disaster will assuredly overtake anyone who does so.

In conclusion, I have to thank my old friend and teacher, Dr. William Wynn Westcott, for his kindness in allowing me to use his "Sketch of the Origin and History of Astrology" as an Introduction to my book; his prolonged researches and his knowledge of Astrology and of the other Occult Sciences are well known.

THE HISTORY OF ASTROLOGY

THE nations of the ancient world were all more or less of opinion that the movements of the heavenly bodies, the occurrence of eclipses, and the appearance of comets exercised an influence over the fate of the human race, and the destinies of men. They feared the extraordinary manifestations of the sky, and saw portents destined for their instruction in the eclipses of the sun and moon, and in notable conjunctions of the planets. Eclipses of the sun especially, which caused a temporary darkness, seemed to them to be warnings of the anger of their gods, and signs of coming punishment.

The Greeks and the earlier Romans do not appear, so far as Greeks and Roman literature can show, to have practised, studied, or taught any original system, of which the astronomic observations were used for purposes of astrologic divination; this line of thought seems rather to have had its origin among the Chaldeans of Babylonia, from whom it came to the notice of the more Western nations after the travels and wars of Alexander the Great.

The Greek philosophers did not readily adopt astrologic ideals, but professors of the Chaldean magical art of Astrology spread among them, and we find astrological notions become notable in the later years of the Roman Republic, and were well marked in the curious jumble of Eastern and Western science which existed in the third and fourth centuries of our era.

The Greeks made a considerable study of Astronomy, and so were in a position to understand the claims made by the Chaldeans for their views of the influence of the stars upon human destinies. Having learned the elements of the strange astrologic doctrines, the later Greeks sought for references to them in their own earlier writers; and especially in the venerable works of Homer and Hesiod, possibly because they disliked to

acknowledge that any sort of learning was not in the possession of *their* ancestors.

So far as can be judged the deities of the early Greeks were not closely related to the Sun and Planets, although the later Greeks identified their Apollo with Helios the Sun, and Artemis with the Moon. The earlier Greeks looked upon the Sun as driving his chariot through the sky, but the sun was not an Olympian God, and held a minor rank in the earliest Pantheon. Venus, the planet, was called Hesperus, as the evening star, and there was the morning star Eosphorus, but it was not until the time at any rate of Pythagoras, circa 612 B.C., that they were considered to be the same heavenly body. It has been asserted by Müller, the German savant, in his treatise on Mythology, that the astronomical Greek myths were few, and they were *not* closely related to their religion.

In the Iliad of Homer, neither the Sun nor Moon is spoken of as driving a chariot, but in the Odyssey Aurora, the Dawn is so described.

According to the much later Roman author Manilius, the chariot of the Sun had four horses, and the chariot of the Moon only two.

Aristotle is the earliest writer whose works are extant in Greek, who mentions the circle of the Zodiac. Euripides, however, speaks of Hippo, daughter of Chiron, as being able to divine future events by means of observations of the stars.

It is of course true that recent writers on Greek myths have asserted relations between the incidents of these myths and astronomical facts, and have explained that Greek and Roman religious ideals were connected with the worship of the Sun, Moon, and Stars.

The probably mythical Orpheus is said to have first taught Astronomy to the Greeks.

There are three lands which contest the claim to the earliest astronomical observations, Egypt, India, and the Akkadian empire of uncertain area, to which succeeded the Babylonian civilization with which the Chaldeans and Hebrews were later associated. China also postulates a claim to an unknown antiquity for its astronomic learning, and Astrology has always flourished among

the Chinese. There are really no data yet discovered which can prove which land was the source of Astronomy; most probably the study was undertaken not only separately, but at much the same early period.

The Akkadian or pre-Chaldean civilization is only of recent discovery, and has been obtained from studies of excavations in the regions of Babylonia.

From literary evidence derived from antiquity we have some proofs of very early astronomic observations made by all these ancient nations. The old Greek and Roman authors refer the source of Astronomy variously to Egypt, to Chaldea, and to Persia, and the papyri recently discovered in Egypt also show astronomical allusions; while of course the pyramids of Egypt and the towers of Babylonia have led students to postulate that their builders possessed a deep astronomic knowledge. Modern researches into Sanscrit literature have also led students of Eastern lore to the belief that the inhabitants of India in the earliest times must have made long and accurate observations of the heavenly bodies.

According to Isaac Meyer there is reason to think that the Akkadian observations of the stars date back to about 4310 B.C., when the Vernal Equinox occurred in the sign of Taurus.

The earliest allusion to actual divination by the stars in Greek literature is found in the "Timæus" of Plato. Eudoxus became acquainted with Chaldean Astrology.

Diodorus the historian, who flourished about 30 B.C., states that the Chaldeans foretold the death of Antigonus in 315 B.C.

Vitruvius states that Astrology was introduced into Greece by Berosus, who settled in Cos, and held a school there. Berosus was a Chaldean and was a contemporary of Alexander the Great.

From his time Astrology became naturalized among the Greeks. It was much cultivated by the Stoic philosophers.

From Greece the study passed naturally to Italy and to Rome. Cato the Elder refers to it.

Cneius Octavius had an astrologic figure found on his person when he was slain in the days of Marius.

Sylla was advised by the Chaldeans. Cicero speaks of divina-

tion received by Pompey and Crassus. Lucian also states that Julius Cæsar noted the revolutions of the stars.

Nigidius Figulus was famous as an astrologer in the later years of the Roman Republic, and foretold the supremacy of Augustus Cæsar.

These Roman astrologers became generally known as Chaldeans, whether they were Greeks or Italians; they rose to the zenith of fame in the early century of the Empire, but later were restrained by legal decisions, from the overt practice of their Art.

Theogenes, a citizen of Apollonia, was consulted by Augustus Cæsar.

Thrasyllus was the astrologer of Tiberius Cæsar; his son was consulted by Nero.

Ptolomæus advised Otho, and Seleneus gave warnings to Vespasian. These facts are narrated by the historian Tacitus. The astrologer Heliodorus was the adviser of the Emperor Valens.

Juvenal mentions the astrologers on several occasions.

The early Christian fathers all condemned judicial astrology, among these Tertullian, Augustine and Isidorus were most famous.

Apart from mythological fancies, the first man of whom it can be proved that he had astronomical knowledge is Thales, a citizen of Miletus, and the founder of the Ionic system of philosophy; he died about 546 B.C. He predicted an eclipse, the horrid darkness of which stopped a battle between the Medes under Cyaxares, and the Lydians led by Alyattes.

He was believed to have gained his knowledge of the heavenly bodies from Egyptian sources; Josephus and Plutarch both say he went to Egypt to study astronomy.

The Greeks seem to have recognised a meteorologic astrology, but not a divinatory form. The chief outflow of Chaldean lore over Greece was during the first three centuries before Christ. The Greek philosophers had good reasons for adopting its notions: first, because their Oracles had ceased to speak and they needed an alternative mode of divine guidance. Secondly, they approved of the idea of a personal genius for each man, and so took kindly to the astrological ideal of a planetary guardianship and

influence; and lastly, as many Greeks taught that the souls of great men became stars, so many stars must have a relation to men still living on earth; this idea especially was related to the stars of the Via Lactea or Milky Way. The poet Manilius has left some verses on this subject.

The astrology of the early Romans was an intricate and difficult study; its professors were called the Mathematici. From their time throughout the years even to Kepler, who died 1630, it may be said that every astronomer was also an astrologer to some extent. From his time the tendency to renounce astrologic claims has continually increased, until at the present day it is rare to find an astronomer of position who acknowledges any faith in prediction or in diagnosis of character from the position of the planets at birth of any man, and still less will he believe in the processes called Horary Astrology, or the judgments of Fate derived from figures of the sky drawn for the time of the special event, or for the time of asking the question.

To return to the origins of history, we find references to astrologic notions in the civilizations of Babylon and Chaldea, on the banks of the Ganges of India, on the Nile of Egypt, and also in Turanian Chinese history. From Chaldea Astrology came to Persia and Asia Minor, to Greek culture, to Roman cities, and to the Jews who overspread all these parts after the destruction of Jerusalem.

It is said that the Arabs knew of the science even before the days of Mohammed; the Saracens carried it to Spain about 711 A.D. and the Moors from North Africa brought it afresh to Western Europe by their invasion of Spain in 1237. From the seventh to the thirteenth century the minds of these Arabian-descended conquerors in Europe were filled with astrologic notions; we have heard of the great renown of Messalah, Albumazar, Almanseer, El Batani and Ibn Yunis.

Our English Astrology comes from two sources, direct from the East, and from the Moors through Spain about 1200; but it is only from the time of the invention of printing that we have many records of the science. Some of the earliest volumes treating of Astrology are almost as complete in many points as our treatises written to-day, and most astrological authors of the

last two hundred years have merely copied one from another; even in our own times the most recent books tell us little more than do the works of Lilly, Gadbury, Salmon, Heydon and Coley.

One recent new departure may be noted, by W. G. Old, who has introduced a mode of rectifying nativities by the Pre-Natal Epoch; which he claims to be more accurate than the old methods of the Animodar of Ptolemy, and the Trutine of Hermes. The pseudonymous Raphael has also devised a system of reckoning primary and secondary Directions differing from that of Zadkiel's Lilly.

Quoting, we presume, from Talmudic tradition, Josephus, the historian of the Jews, asserts that Adam was instructed by divine inspiration in Astrology, and that his son Seth practised the art. He wrote about A.D. 66. The annals of the Ottoman Empire, and the history of the Mohammedan rulers in Asia, Africa and Spain, teem with narratives of astrological predictions, and supernatural warnings which helped to arouse the enthusiasm of these hardy and superstitious warriors. Osman the First, the founder of the Ottoman Empire in 1299, is said to have been much guided by a sheik who professed Astrology. Timour or Tamerlane, the Tartar Chief, was induced to make war with Bajazet, the Sultan of Turkey about the year 1400, by warning received by the Astrologer Abdullah Lissan, and defeated him, as had been foretold.

The sudden death of Murad the Second about 1451, who was a Sultan of Turkey, and in good health, was prophesied by the astrologic divination of a dervish; he died three days after.

The glories of the reign of Mohammed the Second was foretold by the astrologers; he ruled from 1452 to 1480; he it was who took Constantinople. An astrologer foretold with correctness the fates of Selim the First, 1520, and of his son Suleyman who was born in 900th year of the Hegira. In the reign of Selim the Second, 1572, there appeared a comet, regarding which the astrologers prophesied great floods, which subsequently occurred, causing immense damage to three cities.

Mohammed the Third received a prophecy from a dervish that he would die in fifty-six days, and it so happened in 1603.

Murad the Fourth was warned by a sheik astrologer in 1640 that he would have an unpropitious fate at an early date, and he did die according to the terms of the warning in 1640.

We possess a record of a celebrated astrologer, Giamasp, surnamed Al Hakim the wise, a physician who flourished in the reign of King Darius Hystaspes of Persia, about 500 B.C. He is said to have foretold the coming of Jesus, the future founding of a great religion by Mahomet, and that the Magian faith should be abandoned; see the classic work of Dr. Hyde on the ancient Persians.

The Old Testament has several references to astrology, and to soothsayers who judged of human events, divining them by the stars. These refer to the Chaldean philosophers, who were called Magi. Consult these references:—Isaiah xlvii. 13: "Let now the astrologers stand up, and save thee from these things." Daniel i. 20: The King found Daniel better than all the astrologers in his realm. Daniel ii. 27: Daniel asks the King if the astronomers cannot show the secret to the King. Daniel iv. 7: The astrologers failed to explain a dream. Daniel v. 7, 11: The King calls on the astrologers to explain a writing. Genesis xli. 8: The magicians are called on to explain a dream of Pharaoh.

In the New Testament, consult:—Acts xix. 19: Men who possessed curious books burned them before Paul.

As regards Divination in general, this magical art is represented by three Hebrew words — Maquesem, Kasiphim, and Lachash. In Numbers xxii. 7, the Elders of Moab and of Midian have rewards for Divination. In Deuteronomy xviii. 9-10, Diviners are condemned, and the Jews are to consider them as an abomination. In Ezekiel xii. 24, the Lord denies the use of Divination to the people of Israel. In Ezekiel xiii. 7, 23, Diviners are forbidden.

In the New Testament we find a note in Acts xvi. 16: A damsel has powers of divination, she brought her masters much money; Paul cast out the spirit, and she lost her powers.

In the Bible there are many references to the stars, planets and Zodiac. Mazzaroth is a word found in Job xxxviii. 32, and is now believed to refer to the Signs of the Zodiac. Genesis i. 14: "Let the lights of the firmament . . . . . be for signs."

Deuteronomy xxxiii. 14: "Blessed be the Lord for the precious things put forth by the moon." The Pleiades, called Kimah, and the constellation Orion, as Kesib, are found mentioned in Job ix. 9. Orion appears to have been also a name applied to Nimrod the mighty hunter ruler.

Amos v. 8 speaks of the seven stars, and Orion.

The name Arcturus, called Ash and Aish, is believed by some to be the stars of Ursa major, and not the star now so called. In Job xxxviii. 32, Arcturus and his sons are referred to.

Jupiter, as Zeus, either as pagan god, or as a planet, is referred to in Acts xiv. 12; and in 2 Maccabee vi. 2, we read that Antiochus sent to the Jews a message that the Holy Temple was to be dedicated to Jupiter Olympus.

In Judges v. 20 we read: "The stars in their courses fought against Sisera"; which seems to imply an astrologic ideal of stellar influence over the fates of men.

Lucifer, the morning star or planet which paled before the rising sun, and in Hebrew called Hilal, was the Greek Eosphoros. This name was not applied to Satan until Jerome so used it; Milton adopted it. The Moon was called Irak and Levanah, or Labanah, and was considered the ruler of night.

The Sun was named Shemesh, and Chamah, and Cheres; and was called the ruler of day.

The Hebrew word for star in general was Kukab, but this word was also applied to the planet Venus, especially by the Kabalistic rabbis of the middle ages.

I may mention a few notable astrologers individually:—

Claudius Ptolemy lived at Alexandria in Egypt, the great centre of learning in the first century, A.D. His works illustrated one of the earlier systems of Astronomy, which have come down to us, and many astrological treatises are extant which bear his name. He was the eminent student who rescued the labours of Hipparchus, who lived 200 years before him, from oblivion. His most famous volume is the "Almagest," and from this work later authors have largely extracted the treatises called "Tetrabiblos" and "Quadripartite," or the Four Books of Astrology. There is a Latin edition, printed at Basle in 1551, still to be found in a few libraries.

The Venerable Bede is said to have studied astrology; he died in 735.

Albumazar, a famous Arab astrologer, flourished in A.D. 800.

Roger Bacon, who lived from 1214 to 1292, was much addicted to astrology.

About 1300 a Franciscan monk, named Guido Bonatus, was a famous Italian astrologer; he divined that his patron, the Earl of Monserrat, should fight a certain battle with success, but should be wounded in the knee, and so it fell out in both events. He wrote "De Astronomia," tractatus x.; these were printed at Basle in 1550.

Henry Cornelius Agrippa was one of the most famous of the old occult philosophers and his works are full of astrological ideas. He was born, 1486, at Cologne; he was astrologer to Francis the First of France about 1524 and lost that office because he foretold unfavourable events. His three volumes on Occult Philosophy were published about 1530. He is said to have formed in Paris and in London secret societies of astrologic and alchymic students, which some think formed one of the sources of the rise in Freemasonry. He died in 1535. A later fourth volume appears to be spurious.

Florent de Villiers was famous as an astrologer at the court of Louis the Eleventh of France about 1645; he carried on a school of astrology, and King Charles the Seventh, the father of Louis the Eleventh, is said to have attended these classes.

Lord Burleigh calculated the nativity of our Queen Elizabeth, and she, with other princes, consulted Dr. John Dee, the astrologer, who was certainly to some extent a charlatan; he lived from 1527 to 1608.

Michael Scott, who lived in the thirteenth century, was famous for his astrological knowledge and was much esteemed by the Emperor Frederick the Second, whose death at Florence happened as he had foretold; he also divined the manner of his own death by the fall of a stone, and this occurred in a church by the falling of a stone from the roof.

Julius Firmicus Maternus wrote an astrologic treatise in Venice, 1497. Valentine Naibod, of Padua, foretold danger to himself from a sword wound, and many years after was murdered

by thieves in his house—they stabbed him. He wrote "De cœlo et terra," libri 3, Venice, 1573.

Nostradamus (Michel de Notre Dame) was one of the most famous astrologers of France; he was the physician of King Henry the Second, and became especially notable about 1555. His astrologic prophesies were written in a thousand stanzas of four lines each. Catherine de Médicis made him her special favourite. He died in 1566 as physician to King Charles the Ninth; the best edition of his "Prophecies" is that of Amsterdam, 1668.

Antiochus Tibertus flourished in the Romagna of Italy in the fifteenth century, and was astrologer to Prince Malatesta of Rimini.

Elias Ashmole, of Oxford, the famous antiquarian, speaks of the Annual Astrologers' Feast, and mentions the Rev. M. Butler, Saunders, Town Clerk of London; Thomas Vaughan, Sir Edmund Dering, and William Backhouse as noted astrologers.

The astrologic works of William Lilly are still consulted; he was born in 1602. He was a great admirer of the "Ars Notoria" of Agrippa. He published an astrological almanac from 1644 until his death in 1681. In 1651 he issued two hieroglyphical pictures, one of a scene of epidemic deaths, and the other of a great fire seen from London Bridge. These events happened fifteen years after, in 1665 and 1666, and he even fell under suspicion of having been privy to the cause of the Great Fire of London. King Charles the First also consulted Lilly when imprisoned in Carisbrooke Castle in 1647, and was advised to travel eastward for safety, but instead he journeyed to the West, with unfortunate results. At the end of William Lilly's "Christian Astrology," edition 1647, there is a valuable catalogue of astrological books.

John Gadbury was a pupil of William Lilly. He became a famous astrologer and published a series of almanacs; he died in 1691. He published his "Genethlialogia, or Doctrine of Nativities," in 1658; "Celestial Ambassador," 1656; "Nativity of King Charles the First," in 1659, and the "Nature of Prodigies" in 1660.

Francis Barrett was the author of "The Magus," published in

London in 1801; it is a compendium of the occult lore of his time. The printing of the Hebrew words teems with errors.

In 1828 there appeared "The Manual of Astrology," by Raphael, which contains coloured prophetic pictures; it is a sound and comprehensive astrological treatise.

"The Familiar Astrologer," 1849, and "The Astrologer of the Nineteenth Century," 1825, were also published by this anonymous astrologer.

It has been asserted that Sir Isaac Newton began his study of astronomy on account of the interest which astrological books had aroused in his mind. He was born in Lincolnshire on December 25 (old style), 1642; he showed from the laws formulated by Kepler the nature of the forces which conduct the planets in their courses.

The astronomical labours of Tycho Brahe, who died 1601, were largely tinctured by astrological ideas; he foretold truly events that happened to Caspar Peucer, the son-in-law of Melancthon, and, in a famous oration, delivered by order of the King in 1574, he dwelt on the importance of the art; again, he drew up the horoscope of the King's eldest son, Prince Christian, in his birth in 1577, and his successor, Kepler, who died in 1630, was also a student of the works of the old astrologers.

Geronimo Cardan, born at Paris in 1501, has left a large number of volumes which testify to his researches into the laws of astrology; he was both an M.A. and an M.D.

A very sympathetic reference to Astrology as the forerunner of astronomy will be found in "Old and New Astronomy" by Richard A. Proctor, London, 1892. He says—"None of the races of antiquity rose *above* a certain level of civilization without developing a belief in the influences of the heavenly bodies, and without devising systems for reading and ruling the planets."

According to Lalande it was not until the time of Saint Clement of Alexandria in the second century, that Natural became distinguished from Judicial astrology, and Astronomy from Astrology.

Astrology then has been a science from the earliest times, and eminent men of all ages have either made it a study, or have

sought the advice of astrologers. Its attractiveness has led many men to a serious study of astronomy, a more tangible science, which has developed into enormous importance. That Astronomy has supplanted Astrology is certain, and yet astrological ideals are still very much of interest to a great number of people. The hope of a possible science of knowing the unknown is doubtless at the root of the matter. Man is always seeking to know what is hidden, and the renewed interest in all forms of occult science is one of the phenomena of our own times.

Men and women are no longer persecuted for occult learning, but they are still subject to mild rebuke and some public slights, if they openly avow a hope of the possibility of any form of divination—a proceeding condemned by the Christian faith.

This objection is made light of by many students, because history shows that all forms of even recognised science were at one time condemned by the Church; they have not forgotten the persecutions of Galileo. It is still an open question whether there is any stellar or planetary influence upon man, beyond the recognised action of the sun and moon. All other heavenly bodies are certainly very far off and have hardly any appreciable physical action upon our earth and must have still less on individual man. Still gradation of influence is more in keeping with nature's laws than is abrupt termination or absence of influence. Occasional successful astrological results point to the existence of a basis of truth in the science, but frequent errors made by its most noted professors certainly show that the rules of Astrology are still far from being accurate. Until modern science can show the astrologer, by some ultra-astrological explanation, why some of his results have been correct, the astrologers may claim to believe that the methods and principles of divination have some basis in the workings of nature.

Collation (iv) 12 pp. Part II. 57 pp. Part III. 25 pp. Each Part is separately paged.

The author of this rare and curious work (which was burnt at Nantes by the Public Executioner) was, according to Leibnitz, the famous Capucin Father, Yves de Paris. This original edition, which was printed at the expense of the Marquis d'Asserat, is much sought after by the curious, as in the reprint the predictions respecting Europe, the sole cause of the work being condemned to the flames, were entirely omitted. Amongst the predictions to England are: in 1666, "Magna Calamitas" (the year of the Great Fire of London); in 1691, "Magna Reipublicæ Turbatio" (General Ginkel's wars in Ireland); in 1705, "Adversa Omnia" (a mistake, witness the successes of the Duke of Marlborough and Earl of Peterborough); in 1756, "Minatur Maximum Excidium" (war declared against France).

Bickerstaff (Isaac) *pseud.* [*i.e.*, JONATHAN SWIFT].

A very amusing controversy took place A.D. 1708 between JONATHAN SWIFT and JOHN PARTRIDGE, the Astrologer and Almanack Maker; the following pamphlets are taken out of E. Arber's reprints, contained in his work, "An English Garner," Vol. VI., 4to, Birmingham, 1883.

117 **Predictions** for the Year 1708, wherein the Month and Day of the Month are set down, the Persons named, and the Great Actions and Events of next year related, &c., written to prevent people from being further impos'd on by vulgar Almanack Makers. 4to. 8 *pp.* London

118 **A Revenue Officer** [Jonathan Swift], a Letter to a Lord, 30 March, 1708

119 **An Elegy** on Mr. Partrige, the Almanack Maker, who died 29 March, 1708

A broadside, published 30th March, 1708.

120 **Squire Bickerstaff** detected, or the Astrological Impostor convicted by JOHN PARTRIDGE, Student in Physic and Astrology, a True and Impartial Account of the Proceedings of Isaac Bickerstaff, Esq., against me. London, 1708

This was written for Partridge either by Nicholas Rowe or Dr. Yalden, and put forth by him, in good faith, in proof of his continued existence. Not satisfied with this *Impartial Account*, when next Almanack time came (in the following November, 1708) PARTRIDGE'S *Almanack* for 1709 contained a further disclaimer. Swift's reply was the following, *viz.* :—

121 **A Vindication** of Isaac Bickerstaff, Esq., against what is objected to him by Mr. Partridge in his Almanack for the present year, 1709, by the said ISAAC BICKERSTAFF, Esq. 8vo. 8 *pp.* London, 1709

122 **The British Visions** of I. Bickerstaff's Twelve Prophecies for the year 1711. 12mo. 23 *pp.* N.P. or D.

Under the combined assault of the Wits, PARTRIDGE ceased to publish his *Almanack* for a while, but afterwards took heart again, publishing his "*Merlinus Redivivus*, in 1714; it contains an epistle to his adversary, and exhibits some acrimonious repartees.

123 **Unverfanglische** Gedancken über die unlängst im Druck herausgekommene aus der Englischen Sprache übersetzte, &c. 4to. 4 *pp.* 24 Martii, 1708

124 **Wonderlyke** Prognosticatie ofte Voorzegginge wat in dit Jaan 1708. 4to. 4 *pp.* Gravenhage

125 **Wundersahmes** Prognosticon oder Propheze-yung was in diesem 1708 ten Jahr geschehen soll., &c., Nach der zu London gedruckten Copia. 4to. 8 *pp.*

In this edition Kirby's name is conspicuous by its absence. Both of these students were pupils of a Dr. Francis Wright, who was the sole possessor of the only copy in England of The Primum Mobile of "Placidus de Titus." Wright threatened to destroy the book, as Lilly, Gadbury and Coley sneered at the Placidian system and declined to have anything to do with it.

129 **Black Almanack** (A), or Predictions and Astronomicall (*sic*) Observations, foreshewing what will happen to the King of Scots this present year, from the Aspect and Conjunction of the Planets, on the day and hour of his Coronation, the first of January, 1651, &c. **Black letter.** 12mo. 16 *pp.* London, 1651

This is the only complete collection of this Author's works; it is handsomely got up and is well printed.

203 **Cardano** (Girolamo, of Milan, Physician): his Life, by Henry Morley. 2 vols, 8vo. London, 1854

Collation, Vol. I. (xii) 304 pp. Vol. II. (iv.) 328 pp.

204 **A Biographical Study,** by *W. G. Waters.* Portrait. 8vo. London, 1898

This is a fine account of this wonderful man's life and work; it is a pity, however, that the Author did not think fit to add a bibliography of his works, it would have greatly enhanced its value.

Collation (viii) 666 (ii) pp.

The Author of these works was a disciple of Eliphas Levi, and also had access to Cardinal Richelieu's library, from which he drew largely on the works of *Francesco Giuntini* and *Julius Firmicus Maternus;* consequently the information he obtained is very valuable, and must be regarded as some of the best we have in modern times. He himself states that his system is almost infallible; I can say personally that the portion dealing with Revolutionary figures is very remarkable.

224 **Christmas** (Henry) The Cradle of the Twin Giants: Science and History. 2 vols, 8vo. London, 1849

Collation, Vol. I. (xxxiv) 354 pp. Vol. II. (iv) 402 pp.

This work contains several chapters on Astrology; also a bibliography of mystical books.

Collation (xvi) 272 (viii) pp.

447 **Obsequium Rationabile,** or a Reasonable Service performed for the Cœlestial sign Scorpio, in XX. remarkable Genitures of that glorious, but stigmatized Horoscope, against the malitious and false attempts of that grand (but fortunate) Imposter, Mr. William Lilly. 12mo. London, 1675

Collation (xvi) 141 pp. *Vide* Article "BENTIVOLIO."

448 **The Just and Pious Scorpionist,** or the Nativity of that thrice Excellent Man, Sir Matthew Hales, born Nov. 1st, 1609, under the Cœlestial Scorpion, astrologically considered. 4to. London, 1677

Collation (viii) 24 pp.

449 **A Ballad** upon the Popish Plot, written by a Lady of Quality (i.e., J. G.), to the Tune of Packington's Pound. One single sheet, also containing "The Second Part of the same Tune." (1679?)

450 **A Ballad,** the Third Part, to the same Tune, written by a Lady of Quality, to the Tune of Packington's Pound (i.e., J. G.). A single sheet. (1679?)

451 **A Ballad,** the Third Part, to the same Tune, written by a Lady of Quality [i.e., J. G.], to the Tune of Packington's Pound. One single sheet. (1679?)

This appears to be a second issue of the preceding sheet.

452 **The Second Part** to the same Tune, or an Answer to the Lady of Qualitie's Popish Ballad of the Popish Plot, to the Tune of Packington's Pound. One single sheet. (1679?)

This was presumably a reply to the three preceding sheets, but it may have emanated from Gadbury's pen.

453 [**Gadbury** (John)] The Nativity of the most Valiant and Puissant Monarch, Lewis the Fourteenth, King of France and Navarre, astronomically and astrologically handled. 4to. 35 *pp.* London, 1680

Giuntini (Francesco).

This Author is also known as *Junctin de Florentia*, he was a famous Doctor of Theology, and Almoner of François de Valois, the youngest Brother of Henry III., King of France. His work, the *Speculum Astrologiæ*, is of the highest importance, as it contains the whole theory and practice of the Art, elaborated with the most perfect precision ; the foundation of it is taken from a Greek work, by *Claudius Ptolemy*, one of the last of the grand succession of Initiates who espoused the Alexandrian School of Philosophy. The original manuscript enunciated the Hermetic traditions of Egyptian Oriental Magic, while our Author's commentary contains the result of his life-long researches among the profundities of Chaldaic Astrology, Jewish Cabbalism, and Arabian Theurgy. The substance, however, has been republished in a modern work by a French Author, *P. Christian*, who in his "Histoire de la Magie," gives us the key of the teachings in a modern garb.

A scholarly work. We all owe a debt of gratitude to Dr. Westcott for rescuing this MS. and giving us such an excellent translation; there is an Arcana in these Tarot Trumps which many modern students have vainly endeavoured to discover; the fanciful nonsense that has been circulated chiefly in France and America is hardly credible; each self-constituted Hierophant beats his own drum and shrieks himself hoarse in asserting he has the real secret; it is only another case of the blind leading the blind.

Lilly (William).

This Author I have considered worthy of occupying the foremost place amongst Englishmen who have studied this Ancient Science, so I have thought fit to insert his portrait as a frontispiece; he flourished during the troublous times of King Charles and the Parliament, and he certainly gave the King good advice, as, when he departed from it, things went badly with him; he foretold the Great Fire of London and the Plague, and got into trouble over it, as he was accused of being an accessory to the act, but happily proved his innocence. Elias Ashmole, the Antiquary, Freemason, Astrologer, and Alchemist, bought Lilly's Library of Books three days after his death from his widow, for the sum of fifty pounds; money in those days was worth a good deal more than it is now.

It contains a horary figure, drawn up 19th Jany., 1648, to determine whether King Charles should live or die, and Lilly's judgment was to the effect that he would die by the axe; but that, if he survived the 31st January, it was possible he might live a little longer.

683 **Mr. William Lilly's** True History of King James I. and King Charles I., with sundry Observations, remarkable Passages, and many Secret Transactions not till now divulged, faithfully published from his own copy. 12mo. London, 1651

Collation (ix) 108 pp.

684 **Monarchy or no Monarchy** in England. Grebner, his Prophecy concerning Charles son of Charles, his Greatnesse, Victories, Conquests. The Northern Lyon . . . and Chicken of the Eagle, discovered who they are, of what Nation . . . Passages upon the Life and Death of the late King Charles, Aenigmaticall Types of the Future State and Condition of England for many years to come. 4to. London, 1651

Collation (viii) 120 pp. and 10 leaves containing 19 woodcuts.

This is one of the Author's most important works, on account of his predicting the Plague, the Great Fire of London, the Downfall of Episcopal Power, &c., in the woodcuts at the end. The plates foretelling the Great Fire, which occurred fifteen years later, depict two children embracing one another, topsy turvy, signifying the sign Gemini which rules London, beneath which a huge fire is burning, whilst the group of people around are vainly endeavouring to quench it; another plate shows rows of burning houses on both sides of a large river, which might readily be taken to signify the Thames; the plates showing the Plague are equally significant. The original MS. of Grebner's Prophecy, as presented to Queen Elizabeth, A.D. 1574, remains in Trinity Coll. Library, Cambridge, having been presented thereto by Dr. Newell, Clerk of the Closet to the Queen. The printed editions of 1648 and 1650 are counterfeits.

685 **Annus Tenebrosus,** or the Dark Year, or Astrologicall Judgements upon two Lunar Eclipses, and one admirable Eclips of the Sun, all visible in England, 1652; together with a short Method how to Judge the Effects of Eclipses. Fine vignette title-page. 4to. London, Printed for the Company of Stationers and H. Blunden at the Castle in Corn-hill, 1651

Collation (xvi) 64 pp. On Eclipses (iv) 44 pp.

686 **Monarchy** ofte geen Monarchy in Engelant Door Willem Lilly, Student in d'Astrologia gestranslateert na d'Origineele Copy Tot. Finely engraved title-page. 4to. London, 1653

Collation (iv) 70 pp.

A Dutch translation of W. Lilly's work, printed in **black letter**.

687 **Anima Astrologiæ,** or a Guide for Astrologers, being the "Considerations of the famous Guido Bonatus," faithfully rendered into English, as also the choicest Aphorisms of Cardan's seven Segments, translated and edited by the famous William Lilly. Portraits of Guido, Cardan and Lilly, and Table. 12mo. London, 1676

Collation (vi) 118 pp. Aphorisms 53 (x) pp.

This was Lilly's last work, and has been reprinted by W. C. Eldon Serjeant. 8vo. London, 1886.

688 **Astrological Judgments** for the year 1682. Vignette title-page. 8vo. 96 *pp.* N.P., December, 1680

689 **Catastrophie Mundi,** or Merlin Revived, in a Discourse of Prophecies and Predictions and their Remarkable Accomplishment, with Mr. Lilly's hieroglyphicks exactly cut, &c., by a Learned Pen. 16 *plates.* 16mo. 123 *pp.* London, 1683

This is a re-issue of the Appendix to "Monarchy or no Monarchy," by Wm. Lilly.

690 **Great and Wonderful Predictions** (The) of that late famous Astrologer, Mr. Lilly, and Mr. Partridge and Mr. Coley, concerning this present year 1683 . . . with a True and Faithful Account of the famous Prophecies of the three German Prophets, &c. 4to. 8 *pp.* London, 1683

The above prophecies were foretold by Lilly in 1655.

691 **Mr. William Lilly's** History of his Life and Times from the year 1602 to 1681, written by himself in the 66th year of his age to his worthy friend, Elias Ashmole, Esq. Published from the original MSS. 12mo. London, 1715

Collation (iv) 116 pp.

Two Editions were published in the same year with the same collation.

692 **Lilly** (William) History of his Life and Times from the year 1602 to 1681, written by himself in the 64th year of his age to his Worthy Friend, Elias

Ashmole, Esq. 8vo. London, Reprinted for Chas. Baldwyn, Newgate Street, 1822

This reprint of a portion of No. 737 contains twelve fine steel engravings of Lilly, Dr. Dee, Oliver Cromwell, and others of contemporary times; it is a fine edition and well printed. Another edition appeared A.D. 1826.

693 **An Introduction** to Astrology; containing Rules for the practice of Horary Astrology, divested of the Superstitions of the 17th century: to which are added numerous emendations adapted to the improved state of the Science in the present day, by "Zadkiel." Portrait. 8vo. London, 1835

694 **Christian Astrology**, modestly treated of in Three Books. Plate. 8vo. London, Reprinted in 1839 for W. C. Wright.

Collation 256 pp.

An attempt was here made to reprint our Author's most famous work, but it was doomed to failure, as the above only represents a small portion of it.

Lilly (William).

Spurious Works attributed to this Author, all of them rubbish and catchpennies.

695 **Mr. Lillyes** Prognostications of 1667, predicting the Prosperity, Satisfaction, &c., of the English. 4to. 19 *pp.* (London ?), 1667

699 **Lillies** New Prophecy, or Strange and Wonderful Predictions relating to the Year 1678, as well from the late Blazing Star, the Great Conjunction of Saturn and Mars, &c., with Allmance. 4to. 8 *pp.* London, 1678

700 **Mr. Lillies** New Prophecy, or Sober Predictions of a Peace between the French and the Dutch and their Allies, speedily to be concluded, &c., with Allmance. 4to. 8 *pp.* London, N.D. (1674 ?)

701 **Mr. Lillies** New Prophesie of a General Peace, together with the Uniting of all different persuasions of Religion in principles of Love and Mutual Condiscention. 4to. 8 *pp.* 1674

702 **Mr. Lillies** Astrological Predictions for the year 1677, wherein is plainly expressed, and by the Rules of Astrology Proved: The Happy Condition of this our Nation for the year ensuing, &c., with Allmance. 4to. 8 *pp.* London

703 **Mr. Lillies** Predictions concerning the many Lamentable Fires which have lately happened, with a full account, not only of all the Great Fires in England this present year 1676, as at Cottenham, near Cambridge, &c., with Allmance. 4to. 8 *pp.* London, 1676

704 **A Peculiar Prognostication** Astrologically predicted according to Art: Whether or no, His Majestie shall suffer Death this present Yeere 1649; the possibility thereof discussed and divulged. 4to. 6 *pp.* Published for generall satisfaction, 1649

705 **The Dangerous Condition** of the United Provinces Prognosticated, and plainly demonstrated, &c., with Allmance. 4to. 8 *pp.* London, 1672

706 **Lillies** (Mr.) New Prophesie of a General Peace, together with the Uniting of all different persuasions of Religion, in principles of Love and mutual condiscention (*sic*), &c. 4to. 8 *pp.* N.P., 1674

707 **Lillies** (Mr.) New Prophecy, or Sober Predictions of a Peace between the French and the Dutch and their Allies, speedily to be concluded, &c., with Allmance. 4to. 8 *pp.* London, 1675

708 **Lillies** New Prophecy, or Strange and Wonderful Predictions relating to the Year 1678, as well from the late Blazing Star, &c., with Allmance. 4to. 8 *pp.* (London?) Nov. 8, 1678

709 **Lilly's** (Mr.) New Prophecy, or certain Notable Passages in his Writings observed . . . account of the future plenty or scarcity, &c., with Allmance. 4to. 8 *pp.* London, Printed for L. C., 1678

711 **Pseudastro'logos** (ΨΕΥΔΑΣΤΡΟ'ΛΟΓΟΣ), or the Spurious Prognostication Unmasked, being a short Examen of the manifold Errors and Fallacies, Falsehoods and Flatteries, published by Mr. W. Lilly in his Merlin, 1659. 4to. 16 *pp.* (London?), 1659

712 **Fore-Warn'd,** Fore-Arm'd, or England's Timely Warning in general and London's in particular, by a Collection of Five Prophetical Predictions published by Mr. William Lilly forty years ago, &c. 4to. 8 *pp.* London, Printed for John Powel, 1682

713 **Lele** (W.) An English Ephemeris, or Generall and Monethly (*sic*) Predictions upon severall Eclipses and Celestiall Configurations for the Yeare of our Lord 1650, by W. Lele, Student in Astrology. 12mo. 80 *pp.* London, 1650

This is a bastard work, by a man who tried to hoist himself on W. Lilly's success, by a colourable imitation of his name and style; even the badly executed vignette title is a clumsy copy of the genuine Almanac.

714 **Lilly** (Mr.) A Groatsworth of Wit for a Penny, or the Interpretation of Dreams by Mr. Lilly. 12mo. 15 *pp.* Printed for W. T., and sold by Jonah Deacon at the Sign of the Angel in Guilt-spur-Street without Newgate (circa 1670)

An account of this curious little work is given in J. O. Halliwell's Catalogue of Chap Books (No. 190).

Collation (lxiv) 176 (vii) pp.

734 **Lindenbrogius** (Henric) Censorinus de Die Natali, &c. 8vo. Lugduni Batavorum Ex Officina J. Maire, 1642

Collation (xvi) 250 (xxxviii) and plate at page 89.

735 —— Censorinus de Die Natali, &c. 8vo. Cantabrigiæ, 1695

Collation (xiv) 212 (xliv) pp.

736 **Lindsay** (James Bowman) The Chrono-Astrolabe; containing a full set of Astronomic Tables, with rules and examples for the calculation of Eclipses and other Celestial Phenomena; connected with these, the dates of Ancient Events are exactly determined, and the Authenticity of Hebrew, Greek, Roman and Chinese Writings is demonstrated. 8vo. Dundee, 1858

737 **Lives** (The) of those eminent Antiquaries, Elias Ashmole, Esqre., and Mr. William Lilly, written by themselves; containing, first, Wm. Lilly's History of his Life and Times, with Notes by Mr. Ashmole; secondly, Lilly's Life and Death of Charles I.; and lastly, The Life of E. Ashmole, Esq., by Chas. Burman. Fine portraits of both men on one page. 8vo. London, 1774

Collation (vii) 399 pp.

Burman's Life appeared A.D. 1717 (*vide* No. 190), and Lilly's Life has been reprinted (*vide* No. 692). The above work is replete with interest, as Lilly furnishes us with many interesting particulars of the unfortunate monarch, King Charles, and the share he had Astrologically in predicting success or otherwise to his varying fortunes.

738 **Lizeray** (Henri) Horoscopes des Poètes. 8vo. 16 *pp.* Paris, 1892

761 **Age** (The) of Mental Emancipation, by *S. A. Mackey*, in which is shown the exact agreement of Geological Discovery with the Ancient Astronomical Observations of the Hindoos, &c. 8vo. 28 *pp.* Norwich, 1836

---

762 **Magini** (G. A.) . . . de Astrologica ratione, ac usu dierum criticorum seu decretoriorum . . . opus duobus libris distinctum quorum primus complectitur commentarium in C. Galeni librum tertium de diebus decretoriis, &c. 4to. Venetiis, 1607

763 **Manfredi** (Bartolomeo) L'Astrologia alla Corte di Mantova, by Ferdinand Gabotto. 8vo. 41 *pp.* Torino, 1891

Munfredus (Girolamus), **Manfredus** (Hieronimus di), *vide* MANFREDI (Girolamo di).

764 **Manfredi** (Girolamo di) Centiloquium de Medicis et Infirmis. 4to. 10 *unpaged leaves.* Bononiæ, 1489

One of the earliest works on Medicine, treated Astrologically.

765 **Manfredi** (Girolamo di) Conclusione Judiciale de Hieronimo de Māfredi del ăno 1478. 4to. 12 *unpaged leaves.* [Bologna, 1479]

Manilius (Marcus).

766 **Astronomicon** Ex officina J. de Regiomontane. 4to. 72 *unpaged leaves.* Nuremberg, 1472

Other Editions have appeared, *viz.* :—Folio, Bononiæ, 1474; 4to, 1475; 4to [1480], &c.

767 **Astronomicon** a Josepho Scaligero ex Vetusto codice Gemblacensi infinitis mendis repurgatum, ejusdem I. Scaligeri Notæ, &c. 4to. Ex-officina, Plantiniana, 1600

Collation (xxxii) 131 (v) pp. Part II., Notes by Scaliger (xx) 510 (ii) pp. Each part has separate title-pages and pagination.

Another Edition was published, Argentorati, 4to, 1655. Both contain numerous old woodcuts of Horoscopes, &c.

768 **Astronomicon** interpretatione et notis ac figuris illustravit M. Fayus, &c. Fine plates. 4to. Parisiis, 1679

Collation (xxviii) 448 (lxvi) pp.

The work contains some finely engraved plates in the text, and is well printed, as indeed all the Delphin Classics are, but they are held in small estimation now-a-days.

769 **Manilius** (Marcus) The Sphere of, made an English Poem, with Annotations and an Astronomical Appendix by Edward Sherburne. Large folding plate. Folio. London, 1675

Collation (xvi) 68 pp. Appendix 221 (ix) pp.

This work is a translation of the first book of the Astronomicon, and contains a very fine catalogue of Astronomers, Ancient and Modern, which is very useful to the student, although the working man commences with Adam; had he done otherwise, possibly his work would not have received so much patronage and success.

770 **The Five Books** of Manilius, containing a System of the Ancient Astronomy and Astrology, together with the Philosophy of the Stoics, done into English Verse by T[homas] C[reec]h. Engraved frontispiece by Burg. 8vo. London, J. Tonson, 1697

Collation (vi) 68, 134 (viii), 88 pp.

771 **Manuscript.** Brahe (Tyc-onis) et F. B. Grosschedel ab Aicha. Calendarium Naturale Magicum perpetuum profundissimam Rerum secretissimarum contemplationem totiusque Philosophiæ cognitionem complectens, Io. Theo. de Bry, excudeb. A large engraving (39 by 22 in.). 1582

A very great curiosity; excessively rare and nearly unique, not more than three copies being known. This is preserved in a volume called "Musæum Hermeticum et artis Cabalistica." There are several other magical pieces with it, which hardly bear mention in this place, as they have reference to knowledge contained in the higher grades.

772 **Manuscript.** Chamber (John) A Confutation of Astrologicall Dæmonology in the Devil's Schools—*vide* Saville MSS., Bodleian Library.

773 **Manuscript.** Scott (R.) A Treatise against Astrology (with the headline Astrology disproved). Beautifully written MS., 106 leaves, with drawings of hands and diagrams of Horoscopes. 1599

An unpublished work of the only man in England who at the time had courage and sagacity enough to inveigh against popular and inveterate superstition. Amongst the illustrations are the horoscopes of Henry VIII., Edward VI., Mary and Elizabeth, as drawn by the Astrologers, with observations upon the falsity of the predictions in every case. Of the dangerous or deadly years predicted for Elizabeth her sixty-sixth year had already passed in health and safety, and the writer ventures to say that her seventy-third would come with equal felicity. This is clear proof that the book was written in 1599 or 1600. There is no name or title to betoken the authorship, but the book was apparently intended for publication under the title given in one of the two headings above mentioned.

The famous Zodiac of Palingenius has passed through as many or more Editions than any similar work. The Author was a famous man in his day, anyhow the Inquisition thought fit to disinter his body and commit it to the flames ! ! ! *Vide* also Articles REYNIER (G.) and WATSON (F.).

902 **Paracelsus** (P. T., Bombast von Hohenheim). His Life and the substance of his Teachings, &c., by Franz Hartmann, M.D. 8vo. London, 1887

A fine readable work, containing a good account of this famous Mystic's times, beliefs, powers and miracles.

903 **Paracelsus** (P. T., Bombast of Hohenheim) The Hermetic and Alchemical Writings, translated into English by A. E. Waite. 2 vols, imp. 4to. London, 1894

The bulk of these volumes are taken from the Geneva folio edition of 1658 in Latin, and give a very good idea of this Author's capabilities ; it is hardly within the scope of a work like this to give more than a few representative works of such a voluminous writer. The famous Schubert collection contained no less than 194 editions of his writings, with 548 other works whose contents partly or chiefly treated of him and his surroundings ; this is the largest collection I am aware of ; it was sold as a whole in 1893. As regards Bibliographies, several have appeared—*viz.*, those by "Adelung," "Borellius," "Du Fresnoy," "Gmelin," and "Mook ;" this latter author's list is nearly complete in numbers, but is quite unreliable in bibliographical descriptions.

All of the best parts of both this and the succeeding work are taken from the book written by Didacus Placidus de Titus and published A.D. 1650 at Milan (*vide* Article No. 1223), although I am unable to find any acknowledgment of this in the Preface, &c., to either work. Probably this explains why these books are so much sought after in the present day, as they are held in high estimation. I notice he describes himself as "Physician to her present Majesty (i.e. Queen Mary), and Student in Astrology."

915 **Flagitiosus** Mercurius Flagellatus, or the Whipper Whipp'd: being an Answer to a scurrilous invective written by Geo. Parker in his Almanack for 1697 [by J. P?]. 4to. 20 *pp.* London [1697?]

984 **Prophetic Messenger** (The) for 1827, or the Events, Predictions, and the Weather that will occur in each month during that year, with a large coloured Hieroglyphical Frontispiece by *Raphael*, the author of the splendid work, The Astrologer of the Nineteenth Century. 8vo. London, William Charlton Wright, the Original Publisher of *The Prophetic Almanack*, 7, York Street, Covent Garden

This was the First Edition and appeared on November 10th, 1826, it was started by RAPHAEL No. I., *i.e.*, *Robert Smith*, or as he was sometimes called, *R. C. Smith*. I have in my possession a volume containing the first four years' Almanacks, and on the inside cover is written in the author's own handwriting, "Mrs. Tovey, with the author, Robert Smith's, compliments," &c.; it is an interesting souvenir connected with this student; he also published in 1832, "A Companion to the Prophetic Messenger: being a key to the last five years, particularly explaining the Hieroglyphics, with copious remarks upon the same," with all the old plates (uncoloured) shortly before his death which occurred in the same year, when RAPHAEL No. II.—*i.e.*, *John Palmer*, undertook its editing.

It would appear that there were two issues of the Prophetic Messenger for 1833, one published by W. C. Wright, who had done so from its commencement; and the other published by J. Denley (the famous bookseller referred to by *Sir Bulwer Lytton* in the preface to his work Zanoni), this latter issue was published anonymously, but its reputed author gives his Horoscope therein under the title of DIXON, BORN MARCH 28, 1795, 8.58 A.M., Lat. 51.31 N., he refers contemptuously to *John Palmer* as

"Shopman to Mr. Ball, Chemist, &c., Duke Street, Piccadilly"; also "*P. Moody* as Messenger to the House of Commons"; it would appear from his account that these two young men had approached Mr. Smith's widow, and she had accepted their services to write the Prophetic Messenger for 1833. I suppose, on hearing this, Mr. Di[x]on thought he would start an opposition Almanack, a copy of which I am fortunate enough to possess; it does not appear, however, to have got beyond its initial number, so, I suppose, that in spite of his youth Palmer was successful, as Wright continued its publication until the issue for 1859, when a new name appeared—*viz.*, "Piper, Stephenson and Spence." I notice, however, that in 1834 Wright states on the title-page, "*Published by the Proprietor, W. C. Wright*, 4, *Paternoster Row*," so I expect he employed Palmer to edit it and he became its Proprietor, probably by arrangement with Mrs. Smith, as no previous issue appeared in this manner, whereas *all* subsequent ones bore a similar imprint. A noteworthy fact in this year is worth recording—*viz.*, The Lunar Aspects and Declinations are first given and are presented in monthly form, and the whole publication was enlarged to 84 pp. In 1836, however, we first have its appearance with *Two Almanacs*, or rather the addition of the one with which we are now familiar of the Ephemeris or Positions of all the Planets.

This was a step in the right direction and must have added considerably to its popularity and success, but I am bound to say that in all these early numbers, and right up to 1873 (when they ceased), the folding *coloured* hieroglyphical plates are masterpieces of mystical work and must have proved a great attraction, the price, however, of 2s 9d was a stiff one for an almanac in those days; it was reduced to half a crown in 1837, and about 1870 to two shillings, which again in 1875 was reduced to the popular price of one shilling, at which it has remained up to the present day. *John Palmer* died in 1837, and was succeeded in the editorship by a *Mr. Medhurst—i.e.*, RAPHAEL No. III. I am unable to find any particulars about him, and he in his turn was succeeded in 1849-1850 by a *Mr. Wakely—i.e.*, RAPHAEL No. IV.; he was a schoolmaster on board H.M.S. *The Victory*, but resigned this in favour of his astrological studies; he gave his Horoscope in the issue for 1853, and, curiously enough, like his predecessor *John Palmer*, died the same year he did so; it would appear to be a fatality about publishing these Nativities in the Messenger. In the issue for 1854, I notice the publisher, W. C. Wright, changed his title, adding the words "and Company," and the work was enlarged to 120 pp. RAPHAEL No. V., now appeared in the person of a *Mr. Sparkes*, who edited the work with ability and skill until his death in May, 1875.

I notice in the issue of 1859 that the publisher, Wright, had died, and the new owners were "Messrs. Piper, Stephenson, and Spence," who, however, did not long remain so, as the issue for 1861 contains a fresh one in the person of "T. T. Lemare," who resigned in his turn in 1873 to Messrs. Catty and Dobson, the latter of whom dropped out of the firm in 1878, leaving Mr. J. E. Catty in sole control; but, curiously enough, he reappeared in 1881, as I find the title of the old firm in the publication for that year, rising again like the Phœnix out of the ashes of the past; however in 1886, Messrs. W. Foulsham & Co. came on the scene, and these well-known publishers have had it in hand ever since; not only have they carried on this highly successful work, but also many others of a similar character, with signal success, bringing occult works within reach of many people to whom they were hitherto indeed a veritable *terra incognita*, and have really supplied a long-felt want; they are doing a great work and I hope they will prosper.

RAPHAEL No. VI. took up the editing in his turn in 1876, and has continued it ever since, he has made many important contributions to the literature and done excellent work in popularising the science as his numerous handbooks afford ample testimony to the immense value of his work in bringing the chief tenets and rules within reach of the multitude at popular prices. I can hardly recommend better works for beginners, as the directions are

clear and precise, and one can scarcely fail to succeed in following out his ample directions to obtain success whether in drawing up a Horoscope or in judging same; for obvious reasons, I refrain from disclosing his identity, which however is well-known to all leading men in the profession.

1069 **Tractatus** Astrologicus de Genethliacorum Thematum judiciis pro singulis nati accidentibus, ex vetustis et optimis quibusq auctoribus collectis. 8vo. Francofurti, 1602—*Other Editions*, 1625 and 1633, *same size, &c., and collations*

Collation 378 (xxix) pp. and folding plates at pp. 38 and 348.

1070 **Traite** Astrologique des jugemens des Themes Genetliaques pour tous les accidens qui arriuent à l'homme apres sa naissance . . . fait François par Jacques Aleaume, &c. 8vo. Paris, 1657

Collation (xvi) 614 (xvi) pp.

Raphael.

This pseudonym was adopted by several students, each of which is dealt with in turn, in chronological order.

ROBERT SMITH (Baptismal name), or R. C. SMITH (Raphael No. I.), was born at Bristol, March 19, 1795, 9 h. 11 min. a.m., and was a carpenter by trade before he took up the profession of an Astrologer ; in 1820 he

married a Miss Sarah Lucas, by whom he had several children, and resided about that time at No. 5, Castle Street East, Oxford Street, London. His chief successes in literature were "The Manual" and his "Prophetic Messenger" (*vide Periodical Publications*), which latter first appeared on Nov. 10, 1826, and rapidly ran through three editions in as many months, and whose sale has since increased every year until, under its present management, it has attained a yearly sale of 162,000 copies (*vide* issue for 1900). What would Mr. Smith think of the result of his puny effort were he alive at the present day? It is a truly remarkable result, and only shows to what height small beginnings may lead to, anyhow, even his success in those early days attracted attention, as I find that in A.D. 1830 Zadkiel published his Herald of Astrology in imitation of Raphael's work, and this also has been a successful almanac, although possibly in a minor degree, down to the present day. He worked with indefatigable industry and perseverance at his occult studies and got through a deal of earnest solid work for the advancement of the Science; his efforts will always be highly esteemed and his name handed down to posterity as a pioneer of his day; when, however, he commenced on Magic, I fancy he rather alienated himself from the friends he had gained by his astrological works. After a long sickness he died on February 26, 1832, at 4 h. 15 m. p.m. For fuller details of this interesting man's life see "Royal Book of Fate," fifth edition, 1833; also "The Prophetic Messenger," A.D. 1833, published by J. Denley.

1071 [**Raphael and Graham**]. Philosophical Merlin. 8vo. London, 1822

This was our Author's first literary effort and is a work on Geomancy; it had but a limited sale and was eventually disposed of by the publisher Denley.

1072 **Straggling Astrologer** (The) has a Title-page —*viz.*, THE ASTROLOGER OF THE NINETEENTH CENTURY, &c., by the Members of the Mercurii, the Editor of the Prophetic Almanack, and other celebrated Astrologers. 8vo. London, W. C. Wright, 1825—but the first number is designated as above, and bears the date June 5th, 1824, 4d. This is entered under P.P., as it appeared in parts, the last one is dated Oct. 30, 1824, *threepence*

This work was not a great success, its title was changed during its publication, and eventually it was disposed of for *eleven shillings a ream in sheets*, the paper alone originally cost one guinea!!!

1073 **Urania**, or Chronicle of the Stars and Mystical Magazine. 8vo. London, 1825

This publication shared the same fate as its predecessors and ultimately found a resting-place at the Publisher Denley's.

1074 **Astrologer** (The) of the Nineteenth Century, or the Master Key of Futurity and Guide to Ancient Mysteries: being a complete System of Occult Philosophy . . . by the *Members of the Mercurii*, *Raphael*, the

Editor of the Prophetic Almanack, &c. The Seventh Edition, supervised, &c., by Merlinus Anglicus, Junior, Gent., author of "Urania," the "Philosophical Merlin," "Sybilline Fragments," &c. Fine coloured plates. 8vo. London, Knight & Lacey, 1825

Collation 2 title-pages (xii) 560 (iv) pp.

This is really a new edition of "The Straggling Astrologer," many of the cuts are the same, and it is wrongly described as being the *Seventh Edition*, it is really the *Second Edition* and seems to have been an unfortunate publication from the commencement, as before this Edition was in the hands of the public, the publisher failed and the creditors placed it in Messrs. Knight & Lacey's hands for disposal, who, strange to say, also went bankrupt; ultimately it was disposed of to a London bookseller (*query Denley*) with, I believe, better results.

1075 **Manual of Astrology** (A), or the Book of the Stars, which contains every requisite illustration of the Celestial Science, or the Art of foretelling future Events by the influences of the Heavenly Bodies. With 3 fine coloured plates. 8vo. London, C. S. Arnold, 1828

Collation 2 title-pages 256 pp.

A fine book and very trustworthy, but *Experientia Docet*, and, remembering how his former efforts had received but scanty financial success, he took the precaution with this work to dispose of the copyright for which he received the sum of £100; fortunately for him he did so, as the wretched publisher lost heavily over the transaction, the work ultimately being sacrificed to a London bookseller.

1076 **Familiar Astrologer** (The): an Easy Guide to Fate, Destiny, and Fore-knowledge, as well as the Wonderful Secrets of Nature, the Curious Art of discovering Future Events, Strange and Marvellous Tales, Rare and Curious Secrets in Natural Philosophy, Dreams, Visions, and a variety of Interesting Astrological Lore, by Raphael . . . 6 plates. 8vo. London, Knight & Lacey, 1828

After the failure of the publishers, the work was sold off in 1832, being completed by J. Bennett, No. 4, Three Tun Passage, Newgate Street.

1077 **Familiar Astrologer** (The): an Easy Guide to Fate, Destiny, and Fore-knowledge, as well as to the Secret and Wonderful Properties of Nature, &c., by Raphael, author of "The Astrologer of the 19th Century" and "The Prophetic Messenger." With 5 fine coloured mystical plates. 8vo. London, 1831—*Another Edition*, 1849

Collation (viii) 716 pp.

1078 **The Royal Book of Fate**: Queen Elizabeth's Oracle of Future Events, from an Illuminated MS. found in the library of the Earl of Essex; to which is added Raphael's Nativity (March 19, 1795), by

Zadkiel, the Seer. Folding coloured plates. 8vo. 68 *pp.* London, N.D. (1829)

This appears to be a genuine work (4,090 different answers) according to the history given of it in the preface; the MS. eventually came into the hands of the bookseller, J. Denley, who sold it for the large sum of twenty guineas!!!

1079 **Raphael's Witch**!!! or the Oracle of the Future, by the author of the "Prophetic Messenger." With ten coloured designs by R. Cruikshank and the Author, &c. 8vo. London, 1831—*Third Edition*, 1835

A fortune-telling work, with some Astrological Horoscopes, &c., at the end.

Raphael No. 2.

JOHN PALMER (Raphael No. 2) was a Chemist, also born at Bristol, on May 28, 1807, 8 h. 28 m. p.m. When Raphael No. 1 died in 1832 Palmer was living at No. 75, Castle Street East, Oxford Street, London, and continued to publish The Prophetic Messenger until the date of his own death, which occurred in 1837. I find by a curious coincidence that the Prophetic Messenger for 1837 contains his Horoscope, with the chief events of his life detailed at length; it also states that he moved house to No. 2, Crescent Cottages, Hackney, facing the Canal (*vide* Article "Periodical Publications, Prophetic Messenger," for further details).

1080 **Raphael's** Sanctuary of the Astral Art, or Elysium of Astrology: being a Book for the Boudoir, &c. . . . Illustrated with emblematical pictures of the Twelve Celestial Houses, &c. 8vo. Folding plate. London, May, 1834

Raphael's Nos. 3, 4 and 5,

Were chiefly interested in editing and publishing the Prophetic Messenger, *vide* PERIODICAL PUBLICATIONS, where full particulars of their history are given; as they did not publish any books on the subject we now pass on to Raphael No. 6, who is the next Author of note.

Raphael No. 6 [*i.e.*, Robert Cross].

1081 **The Guide** to Astrology, containing the complete rudimental part of Genethliacal Astrology, by which every person may calculate their own Nativity, and learn their own Natural Character and Proper Destiny, &c. 2 vols. 8vo. London, 1877-79

The little handbooks are some of the best of our modern works; I can heartily recommend them for those who are commencing the study.

1082 **Raphael's** Horary Astrology by which every Question relating to the future may be answered. 8vo. London, 1883; (ditto), 1887

1083 **A Description** of the Faces and Degrees of the Zodiac as given in the Ancient Authors, being applicable to Genethliacal and Horary Astrology. 8vo. 60 *pp.* London, 1879

1084 **The Geocentric Longitudes** and Declinations of the Four Superior Planets, from 1820 to 1879 inclusive. 8vo. London, 1880

1085 **Raphael's** Private Instructions in Genethliacal Astrology, being adapted for those who are a little advanced in the study of Astrology. 4to. London, 1881—*Another Edition, revised*, London, 1903

Collation 110 single MS. pages.

1086 **Raphael's** Tables of Houses for Glasgow, London, New York, Calcutta, Madras, &c. 8vo. London, 1882

1087 **Raphael** (Albert) *pseud.?* Earthology: Humanity characterized by the Earth, Sun, and Zodiac, with Prognostications from the Moon. 8vo. 222 *pp.* London and New York, 1904

1088 **Raphael** (Albert) Ancient Egyptian Chart of the Earth's Zodiac: Raphael's Masterpiece, by which the Past, Present and Future may be found. 8vo. New York, U.S.A., 1901

This Author must not be confounded with the English *Raphael*, who has for long edited the world-renowned Almanack and Ephemerides, besides publishing quite a library of works on the Science.

1089 **Rapheal's** (*sic*) Astrological Chart of Destiny, or True-telling Book of Fortune, &c. 12mo. London, H. Elliot, 1855

A spurious production.

1090 **Raunce** (John) Astrologia accusata pariter et Condemnata, or the Diabolical Art of Judicial Astrologie receiving the definite sentence of Final Condemnation. 4to. London, 1650

Collation (vi) 36 pp.

This Author lived at Wickham, Bucks, and was at one time a practitioner of Astrology and student of the Magic Art.

1091 **Raunce** (John) A Brief Declaration against Judicial Astrologie, or the Diabolical Art of Astrologie opened, arraigned, and condemned, &c. 4to. 10 *pp.* London, 1650

1092 **Reeve** (Edmund, *D.D.*) The New Jerusalem . . . in a Sermon composed for the learned Society of Astrologers, August 14th, 1651. 4to. London, 1652

Collation (x) 26 pp.

There is an appendix (8 pp.) written against the Art.

1093 **Rawlinson** (Sir H. C.) A Selection from the Historical Inscriptions of Chaldæa, Assyria, and Babylonia. Folio. London, 1861, &c.

This important work contains Astrological Tables, Portents from the Sun, Moon, Planets, and Stars; also a quantity of matter concerning Mythology, Tables of Omens, Articles on Witchcraft, and the various Deities. It ably demonstrates the great antiquity of the Science, showing the ancient beliefs of these people.

Regiomontanus (Johannes), *vide* MUELLER (Johann) *Regiomontanus.*

1094 **Reisch** (Gregorius) Margarita Philosophica (Large Allegorical Woodcut) Aenumerantur que in hoc opere, dicto Margarita Philosophica, contineantur . . . Astrologiæ, Necromantia, Geomantia, artem Notoria, Alchimæ, &c. **Black letter.** 4to. 302 *unpaged leaves.* Argent. [1503]

1095 **Reisch** (Gregorius) Æpitoma Omnis Phylosophiæ alias Margarita Phylosophica tractans, &c. 4to. Argent. [1504]

This is an unauthorised reprint of the first edition, with the addition of a synopsis of Hebrew Grammar, &c.

1096 **Reisch** (Gregorius) Margarita filosofica nella quale si trattano con bellissimo et breve metodo non solo tutte le dottrine comprese nella ciclopedia dagli antichi, &c., tradota dalla, lingua Latina nell' Italiana da Giovan Paolo Gallucci, &c. 4to. Venetia, Somascho, 1599

Several other editions have appeared between this and the last one. The work is a Cyclopædia of Arts and Sciences. The most important portions are these, "De Musica et Musica Figurata" and "De Principiis Astronomiæ" (embracing Astrology, Magic, and Divination). For a full account of all the editions that have appeared I must refer my readers to the following work (No. 1097).

1097 **Reisch** (Gregorius) A List of Editions of the Margarita Philosophica, 1503-1599 [compiled by Wilberforce Eames, 890, Fifth Avenue, New York]. 8vo. New York, 1886

Only 8 copies were prepared for private use, and curiously enough the work consists of 8 single pages.

1098 **Rencontre** et Naufrage de trois Astrologues iudiciaires Mauregard, I. Peitit et P. Lariuey nouvellement arriuez en l'autre monde. 8vo. 16 *pp. A Paris, chez Iean Mestais Imprimeur demeurant à la Porte S. Victor*, 1633

Numerous other editions have since been published.

1128 [**Saint Martin** (Louis Claude de)] Le Ministere de l'Homme-Esprit par le *Philosophe Inconnu*. 8vo. Paris, An XI., 1802

Collation (xv) 472 pp.

The works of this Author are held in high esteem; he was a mystic of a very advanced order and breathed forth a lofty spirituality. I hardly feel justified in including his other writings, as only this one touches on our subject.

1129 **Salmasii** (C.) De annis climactericis et antiqua astrologia diatribæ. 8vo. Lugd. Batavor., ex officina Elzeviriorum, 1648

Collation (cxxviii) 862 pp.

1130 **Salmon** (William) Synopsis Medicinæ, or a Compendium of Astrological, Galenical, and Chymical Physick, philosophically deduced from the Principles of Hermes and Hippocrates, in Three Books, &c. Fine portrait of Author. 8vo. London, 1671

Collation (lxxviii) 1207 (i) pp.

A second edition, much enlarged, appeared 1681, with finely engraved title and portrait.

This is chiefly a medical work, the only reference to Astrology is in the second book on The Prognosis of How to judge and foresee the issue of Disease.

1131 **Salmon** (William) Horæ Mathematicæ seu Urania: the Soul of Astrology, containing that Art in all its parts, in Four Books, &c. 8vo. London, 1679

1133 **Saunders** (Richard) *i.e.*, **Sanders** (Richard) Palmistry disclosed; to which is added that most useful piece of Astrology (long since promised), concerning Elections for every particular occasion, now plainly manifested from Rational Principles of Art, in 3 parts. 12mo. London, 1664

Collation (xxxvi) 572 (xx) pp.

1134 **Saunders** (Richard) The Astrological Judgment and Practice of Physick, deduced from the position of the Heavens at the decumbiture of the Sick Person, &c. Fine portrait of Author and table. 8vo. London, 1677

Collation (xxxviii) 208 and 214 pp.

Wm. Lilly has written one of the dedicatory prefaces and speaks in high terms of Saunders, he signs himself, "Your old Friend and faithful Propagator of Astrology."

This Author also wrote a most important work on Chiromancie, Moles, Dreams, Physiognomie, &c., A.D. 1671; it is full of curious plates and cuts, and, like many other works of this description, have now become very scarce, since copies but seldom are offered for sale.

1135 **Savonarola** (G.) Tractato contra li Astrologi. 4to. 38 *unpaged leaves.* [Bartolommeo de' Libri, Florence, 1495?]

1139 **Sayce** (A. H.) The Astronomy and Astrology of the Babylonians, with Translations of the Tablets relating to these subjects. 8vo. London, 1874

This is an important paper contained in the Transactions of the Society of Biblical Archæology, Vol. III., pages 145 to 339, and forms a most valuable acquisition to the student.

1140 **Scepperus** (Cornelius) Assertionis Fidei adversus Astrologos, sive de significationibus conjunctionum superiorum Planetarum, &c., Libri VI. Folio. Antwerpiæ, F. Byrckmanni, 1523

Collation (xvi) 123 single sheets (vii) pp.

A fine old work, containing some magnificent specimens of early wood-block printing; I can find no mention of it in Brunet.

1141 **Schindler** (Dr. H. B.) Der Aberglaube des Mittelalters, Ein Beitrag zur Culturgeschichte. 8vo. Breslau, 1858

Contains a small bibliography on Mystical Books, a very few of which are devoted to Astrology.

1156 **Schwaeble** (Réné) Cours pratique D'Astrologie. 8vo. Paris

1156A **Scot** (Michael), b. 1175, d. 1234 *circa.* This Author was one of the most Famous Magicians in the World's History; he studied and wrote on Astrology and Alchemy (*vide* Liber Introductorius and Liber Particularis), but I am unable to obtain a sight of any of his books dealing with our Art. There are many of his MSS. in the "Laurentian, Vatican, Riccardian of Florence," and other Libraries; he foretold his own death, which was caused by a stone falling and crushing him; he was appointed Astrologer to the Emperor Frederick II., King of Sicily, and afterwards Emperor of Germany. He wrote under the *pseudonym* of "THEO-

BALDUS ANGUILBERTUS," and Danté alludes to him in the Inferno (Canto XX., 115-117) in a way which proves that his fame as a Magician was widely spread over Europe. The best account of his life and writings is that by the Rev. J. Wood Brown (*vide Article*)

1157 **Scott** (Sir Walter) Guy Mannering, or the Astrologer. 3 vols. 12mo. *First Edition* (many subsequent ones were published). Edinburgh, 1815

1158 **Selva** (H.) Traité D'Astrologie Généthliaque. 8vo. 300 *pp.* Paris, 1900

1159 **Selva** (H.) La Theorie des Determinations Astrologiques de Morin de Villefranche conduisant a une méthode rationelle pour l'Interpretatiou du Thême Astrologique. 4to. Paris, 1902

Collation (vi) 218 pp. and 2 plates.
This is an abridgment of Morin's 21st Book in his "Astrologia Gallica."

Sephariel, *pseud.*, *vide* WALTER RICHARD OLD, now W. GORN OLD.

1160 **Seyffarth**. Systema Astronomiæ Ægyptiacæ quadripartitum, Pantheon Ægyptiacum, Observationes Ægyptiorum Astronomicæ Hieroglyphicæ Descriptæ in Zodiaco, Tabula Isiaca sive Bembina, &c. Fine coloured plate. 4to. Nine large folding plates of Zodiacs, &c., at end. Lipsiæ, 1833

A volume of 445 pp., exhibiting immense research and laborious study.

1161 **Shakerley** (Jeremy) The Anatomy of Urania Practica, or a Short Mathematicall Discourse, laying open the Errors, &c., delivered in a Treatise by Mr. Vincent Wing and Mr. William Leybourne, under the title of "Urania Practica." 12mo. London, 1649

Collation (viii) 40 pp. *Vide* Article Wing (v) No. 1318.

1162 **Shea** (David) and **Troyer** (Anthony) The Dabistan, or School of Manners, translated from the Original Persian, with Notes and Illustrations. 3 vols. 8vo. Paris, 1843

This scarce book is described by Sir William Jones as a work containing "more recondite learning, more entertaining history, more beautiful poetry, more ingenuity and wit, indecency and blasphemy" than he ever saw collected in a single volume. It is full of Eastern Customs and Beliefs, including the Stars and Astrology.

1163 **Shinkin ap Shone** her Prognostication for the ensuing yeer, 1654, foretelling what admirable Events are like to fall out in the horizon of Little Britain, &c. 4to.

6 *pp.* Printed for the Author, and are to be sold at his shop at the Sign of the Cows Bobby behind the Welsh Mountains

1164 **Shurreef** (Jaffur) Qanoon-e-Islam, or the Customs of the Moosulmans of India, comprising a full and exact Account of their various Rites and Ceremonies from the moment of birth till the hour of death, &c., translated by G. A. Herklots, M.D. Plates. 8vo. London, 1832

A most complete record, dealing incidentally with Astrology.

1165 **Siblerius** (Martinius, *pseud.*) The British Astrologer, or Tablet of Fate. 8vo. 64 *pp.* London, N.D. (1899?)

A reprint of Napoleon's Book of Fate, with a fresh title; a fortune-telling book.

1166 **Sibly** (E.) Uranoscopia, or the Pure Language of the Stars unfolded by the Motion of the Seven Erratics, &c. 8vo

A volume containing numerous blank Horoscopes, &c., with some finely engraved plates.

1167 **Sibly** (E.) A New and Complete Illustration of the Occult Sciences, or the Art of foretelling future events and contingencies by the Aspects, Positions, and Influences of the Heavenly Bodies. In 4 parts. Fine front. and numerous copper-plates. 4to. 1130 *pp.* London, 1790

1168 **Sibly** (E.) A Key to Physic and the Occult Sciences, opening to Mental View the System and Order of the Interior and Exterior Heavens, the Analogy betwixt Angels and Spirits of Men, &c. 4to. London (1794)

Some of the plates are taken from Khunrath's Works, others from Old Rosicrucian Books in German, notably the "Gehemia Figuren, &c.;" a large portion of the book, however, deals with Medicine and Surgery.

1169 **Sibly** (E.) A New and Complete Illustration of the Celestial Science of Astrology, or the Art of foretelling future Events and Contingencies by the Aspects, &c., of the Heavenly Bodies. 4 parts. 4to. 1130 *pp.* London, 1817

A work of immense labour, but it is held in low estimation in the present day.

1170 **Silvester** (John) Astrological Observations and Predictions for the year of our Lord, 1682, wherein are briefly shewn the Significations of the late Comet (which appeared most manifestly to us in Dec., 1680, and of the two great Eclipses of the Moon), &c. 4to. 12 *pp. and plate.* N.P. (Bristol?), 1682

1171 **Silvester** (John) Astrological Observations and Predictions for 1691, with the Signification of the Earthquake that hapned (*sic*) in March last in the City of Bristol; also the Significations of the Three Oppositions of Saturn and Jupiter that will happen in 1692 and 1693, and of the Eclipses of this present year, &c. 4to. 16 *pp.* London, 1690

Simmonite (William Joseph).

All of this Author's works are held in high esteem as they have been found to be reliable and trustworthy.

1172 **The Celestial Philosopher**, or the Complete Arcana of Astral Philosophy: being Genethliology simplified, or the Doctrine of Nativities. [1844]

This was first issued under the title of "The Quarterly Celestial Philosopher, &c."

1173 **The Celestial Philosopher**, or the Complete Arcana of Astral Philosophy: being Genethliology simplified, or the Doctrine of Nativities, Vol. I. 8vo. London [1847]

Collation (viii) 247 pp. and 4 plates.

A modern reprint of this work appeared in 1890, with some additional matter respecting Neptune (a Planet that was unknown to the old Authors), which, in my opinion, would have been better omitted.

1174 **Mathematical** and Astronomical Tables for the use of Students of Astro Mathematics, for Practical Astronomers, Astrologers, &c., with an Introduction, containing an explanation and use of the Tables. 8vo. London (circa 1847)

Collation (xii) 96 pp.

1175 **Astronomical Ephemeris** and Astro-Phenomena, with an Aspectarian of the Sun, Moon, and Planets, 1846—(ditto), 1847. 8vo. 36 *pp.* London

1176 **Medical Botany**, or Herbal Guide to Health, explaining the Natural Pathology of Disease, with hundreds of Herbal Receipts, &c. 8vo. London (1848?)

There is a modern reprint of this work published at a popular price.

1177 **The Astro-Philosopher** and Meteorologist. 8vo. London (circa 1848)

Collation (iv) 240 pp.

A work full of fine examples of the art and the judgments deduced therefrom; it is one to be recommended to students.

1178 **The Prognostic Astronomer**, or Horary Astrology, containing an improved Method of solving

the Thousand Inquiries relative to Futurity. 8vo. London, N.D. (1851?)

Collation (viii) 582 (xxi) pp.

A fine work, containing some beautiful mystical plates which were diligently incorporated by the late Hargreave Jennings into his last edition of his work on the Rosicrucians, without acknowledgement; a portion of the book is devoted to Astrology; also some of the plates which are most carefully drawn. Lackington, a bookseller in the last century, priced a copy at £20, but that price was about high-water mark, as the work now does not realise one fourth of that amount.

Westcott (Dr. William Wynn).

1295 **Merlini** Anglici Errata, or the Errors, Mistakes, and Mis-applications of Master Lilly's New Ephemeris for the year 1647, discovered, refuted and corrected. 12mo. (London?) 1647

Collation (iv) 58 pp.

A most vituperative work written against Lilly, showing that the feeling ran very high in those days. The language used contains inter alia the following polite expressions:—"Whelp, Bowling Litter, Lowzie Pamphlet, Quondam Hell," &c.; this is not bad for a literary gentleman who wishes to claim the attention of thoughtful people.

1297 **No Merline** nor Mercurie, but a New Almanack after the old fashion for the year of our Redemption, 1647, delivering exactly the Eclipses, Lunations, &c. 12mo. 48 *pp.* (London?) 1647

The feud between the two parties continued actively, as there is a chapter, entitled, "Wharton, 1647, Merlino-Anglico-Mastix, or Lilly lasht with his own Rod;" this is a reply to Lilly's attack on him in his Anglicus, A.D. 1645.

1298 **Calendarium** Ecclesiasticum, or a New Almanack after the old fashion for the commune yeare of Man's Creation, 5606, Redemption, 1657, &c. Portrait. 12mo. London, 1657

Collation (xx) 24 pp.

Others appeared up to 1660, when in 1661 the title was altered to "Calendarium Carolinum" which I can trace up to 1666.

1299 [**Wheeler** (J.)] A Series of Lectures on the Science of Celestial Philosophy, or the Language of the Stars, Part 1, containing the Fundamental Principles by *Zuriel.* 8vo. London, 1835

This was all that was published, there is a folding plate at page 14.

1300 **White** (Thomas) The Beauties of Occult Science investigated, or the Celestial Intelligencer, in two parts . . . Introduction to Astrology, with all the requisites for obtaining a Familiar and General Knowledge of the Science, &c. 8vo. London, 1811

Collation (iv) 436 pp., plate at page 50.

This poor Author died in prison, a martyr to his faith in Astrology.

Collation (xxii) 3 plates, 410 pp., and 1 page errata.
This is the best dictionary we have on the subject.

1312 **Wilson** (John) The Lost Solar System of the Ancients discovered. 2 vols. 8vo. London, 1856

A most learned work. The Author discovers in Obelisks, Pyramids, Aztec Temples, the Circles of Avebury and Stonehenge, Burmese Pagodas, and in Tors and Conical Hills, a series of Astronomical calculations.

1313 **Wilson** (Wm.) Shakespeare and Astrology from a Student's Point of View. 8vo. 12 *pp.* Boston, U.S.A., N.D. (1903?)

Zadkiel No. 1.

[*i.e.* Richard James Morrison], born June 15, 1795, 9 h. 58 m. A.M., sometimes called Zadkiel *Tao Sze* on account of a Society of this name started by him about the year 1870. He published a work called "*The Horoscope*," and also was editor of "*Zadkiel's Almanack*" from A.D. 1830 to 1874, in which year he died (*see Periodical Publications* for both of these works; also Article *R. J. Morrison*).

1329 **The Grammar** of Astrology, containing all things necessary for calculating a Nativity, by Zadkiel, author of several Works on Astrology, First Edition, 8vo, London, 1833—Second Edition, 8vo, London, 1840—Third Edition, 8vo, London, 1849—and many others

1330 **Zadkiel's** Legacy, containing a Full and Particular Judgment on the Great Conjunction of Saturn and Jupiter on January 26, 1842: being their most important Conjunction since the days of King Alfred the Great, &c. 8vo. London, 1842

1331 **An Introduction** to Astrology, by William Lilly, with numerous emendations adapted to the improved State of the Science in the present day: a Grammar of Astrology and Tables for calculating Nativities, by Zadkiel. 8vo. London, 1852

Vide Article No. 693.

A book that can be thoroughly recommended to beginners.

Zadkiel No. 2.

[*i.e. Mr. Sparkes*, who edited the *Almanack* for 1875 only].

Zadkiel No. 3.

[*i.e. Alfred J. Pearce*, who edited the *Almanack* since 1876, and has written several important works on the science, *vide Article*].

1332 **Zadkiel** (Tao Sze) The Hand-book of Astrology by which every question of the future on which the mind is anxious may be truly answered. 2 vols. 8vo. London (1862-63)

This work rapidly went out of print, it is held in high estimation.

1333 **Zadkiel** (Tao Sze) on the Great First Cause: his Existence and Attributes. 8vo, wrappers. 48 *pp.* London, 1867

1334 **An Introduction** to Astrology, by Wm. Lilly, with numerous emendations adapted to the improved

State of the Science in the present day: a Grammar of Astrology, &c., by Zadkiel. 8vo. London, 1887

This edition is published in a popular form in "Bohn's Scientific Library," and for a work on Horary Astrology I can heartily recommend it. Lilly was a very successful student, and his remarks and suggestions are full of point and interest; it is one of the most popular of our modern works; I believe the first edition appeared in 1865, there have been several published subsequently.
